

AP Chemistry Summer Work Instructions

If you enrolled in AP Chemistry during the normal enrollment period you should have received an email to your school email account. This email account uses your ID#@psd202.org. You can access this through outlook email. In your email there should be an email that allows you to join the google classroom that we will be using for the entire school year. I have also posted the resources required to complete the summer work.

Most students who have contacted me because they cannot access the google classroom were trying to access the google classroom through their personal gmail. You must first go to outlook and click join on the email I sent you. Then you must use your school email to login to google.

If you cannot access the google classroom please email me at adellamo@psd202.org. In the email please include your full name and ID number.

I would recommend that you start your summer work in mid-July. The goal is that you comfortably finish the work right before school starts. This does not mean procrastinate and try to finish the entire packet 2 days before the start of school.

Good Luck and enjoy your summer. I look forward to meeting all of you in August!

Mr. Dellamorte
